

The Strimech Heavy Duty Rehandling Bucket is designed to cover a wide section of sectors ranging from agricultural, waste through to plant. The heavy duty design with an 8mm shell and material quality ensures that this bucket is built to last. The clear internal shell design ensure no material collection points whatever the application. Available with either a bolt on wear edge or teeth

- Machine Capacity 2 – 4.5 tonnes
- Bolt-on-Toe Plate fitted as standard
- One Piece 8mm thick rolled back shell.
- Reinforcing wear strips on shell base joining the hanger brackets for added strength
- Option to substitute Bolt-on-Toe Plate for Digging Teeth
- Optional extra Spill Guard.

Model	Capacity (m ³)	Height (mm)	Depth (mm)	Width (mm)	Weight (kg)
